WORKPLACE INITIATIVE

About ONEbox™:

The ONEbox™ is an innovative and compact emergency response kit designed to address overdose situations promptly and effectively. The box is intended to hold two boxes of intranasal naloxone used to reverse overdose. However, using the medication is only the first step of many in responding to an overdose. The ONEbox™ provides on-demand video instructions that guide responders and laypersons through bystander intervention for naloxone administration and overdose response. For more information or to purchase, visit: <https://www.wvdii.org/onebox>.
